TROPICAL CYCLONE BULLETIN NR. 9
Typhoon INDAY (BAVI)

Issued at 11:00 PM, 09 July 2026
Valid for broadcast until the next bulletin at 5:00 AM tomorrow.

"INDAY" SLIGHTLY WEAKENS AS IT DECELERATES OVER THE PHILIPPINE SEA EAST OF NORTHERN LUZON.

Location of Center (10:00 PM)

The center of Typhoon INDAY was estimated based on all available data at **740 km East of Calayan, Cagayan (19.3°N, 128.5°E).**

Intensity

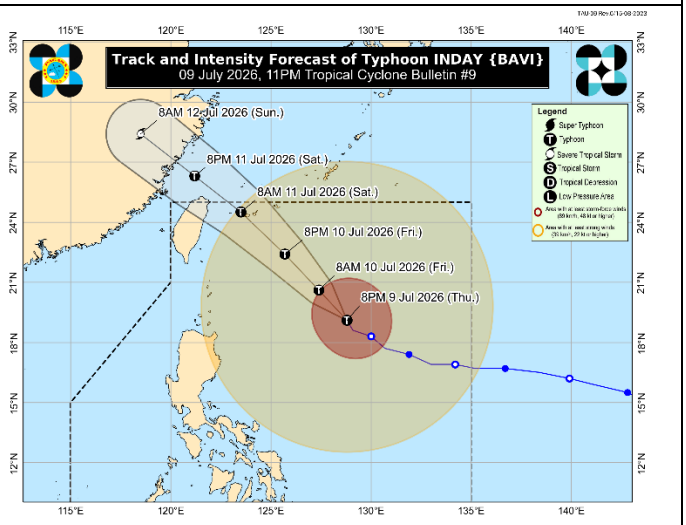
Maximum sustained winds of **155 km/h** near the center, gustiness of up to **190 km/h**, and central pressure of **950 hPa.**

Present Movement

North northwestward at 10 km/h

Extent of Tropical Cyclone Winds

Strong to typhoon-force winds extend outwards up to **860 km** from the center



TRACK AND INTENSITY FORECAST

Date and Time	Center Position			Intensity		Movement dir. and speed (km/h)
	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	
12-Hour Forecast 8:00 AM 10 July 2026	20.6	127.4	565 km East of Basco, Batanes	150	TY	NW 20
24-Hour Forecast 8:00 PM 10 July 2026	22.4	125.7	440 km East Northeast of Itbayat, Batanes	150	TY	NW 20
36-Hour Forecast 8:00 AM 11 July 2026	24.5	123.5	445 km North Northeast of Itbayat, Batanes	140	TY	NW 25
48-Hour Forecast 8:00 PM 11 July 2026	26.3	121.2	615 km North of Itbayat, Batanes (OUTSIDE PAR)	140	TY	NW 25
60-Hour Forecast 8:00 AM 12 July 2026	28.4	118.5	910 km North Northwest of Extreme Northern Luzon or in the vicinity of Zhejiang, China (OUTSIDE PAR)	100	STS	NW 30

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT			
TCWS No.	**Luzon**	**Visayas**	**Mindanao**
2 Wind threat: **Gale-force winds**	**Batanes, the eastern portion of Babuyan Islands** (Babuyan Is., Didicas Is., Camiguin Is.) and **the northeastern portion of mainland Cagayan** (Santa Ana)	-	-
	Warning lead time: **24 hours** Range of wind speeds: **62 to 88 km/h (Beaufort 8 to 9)** Potential impacts of winds: **Minor to moderate threat to life and property**		
1 Wind threat: **Strong winds**	**Luzon**		
	The rest of Babuyan Islands, the rest of mainland Cagayan, Isabela, the northeastern portion of Quirino (Maddela), **Apayao, the northern portion of Abra** (Tineg, Lagayan, Danglas, San Juan, Lagangilang, Licuan-Baay, Malibcong, Lacub, Daguioman, Dolores, La Paz), **Kalinga, the eastern portion of Mountain Province** (Natonin, Paracelis), **the eastern portion of Ifugao** (Aguinaldo, Alfonso Lista), **Ilocos Norte, the northern portion of Aurora** (Dilasag, Casiguran), and **the northern and central portions of Catanduanes** (Pandan, Caramoran, Bagamanoc, Panganiban, Viga, Gigmoto, Baras, San Miguel)	-	-
	Warning lead time: **36 hours** Range of wind speeds: **39 to 61 km/h (Beaufort 6 to 7)** Potential impacts of winds: **Minimal to minor threat to life and property**		

OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to **Weather Advisory No. 14 issued at 11:00 PM today** for the heavy rainfall outlook due to TC INDAY and the Southwest Monsoon.

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Minor to moderate impacts** from gale-force winds are possible within any of the areas under Wind Signal No. 2.
- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

The enhanced Southwest Monsoon and the periphery of Typhoon INDAY will bring **strong to gale-force gusts** over the following areas (especially in coastal and upland areas exposed to winds):

- **Today until Saturday (11 July):** Most of the country.

HAZARDS AFFECTING COASTAL WATERS

A Gale Warning is in effect over the northern and eastern seaboards of Luzon, and the eastern seaboard of Visayas. For more details, refer to Gale Warning No. 5 issued at 5:00 PM today.

24-Hour Sea Condition Outlook

Up to very rough seas over the following coastal waters:

- **Up to 7.0 m**: The northern and eastern seaboards of Batanes.
- **Up to 6.0 m**: The northern and eastern seaboards of Babuyan Islands; the northeastern seaboard of mainland Cagayan; the remaining seaboards of Batanes.
- **Up to 5.0 m**: The seaboard of Isabela; the northern and eastern seaboards of Catanduanes; the remaining seaboards of mainland Cagayan and Babuyan Islands**.**
- **Up to 4.5 m**: The seaboards of Aurora and Camarines Norte; the northern and eastern seaboards of Polillo Islands and Camarines Sur; the eastern seaboard of Northern Samar; the northeastern seaboard of Eastern Samar; the northern seaboard of Ilocos Norte.
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- **Up to 4.0 m:** The northern seaboards of mainland Quezon and Northern Samar; the eastern seaboards of Albay, Sorsogon, and Dinagat Islands; the remaining eastern seaboard of Eastern Samar.
- **Up to 3.5 m:** The eastern seaboard of Bucas Grande-Siargao Islands and Surigao del Sur; the eastern and southern seaboards of Davao Oriental; the remaining seaboards of Catanduanes.
- **Up to 3.0 m:** The seaboards of Marinduque, Romblon, Masbate, and Caluya Islands; the western seaboards of Ilocos Norte, Palawan including Kalayaan Islands, and Occidental Mindoro including Lubang Islands; the southern seaboard of Quezon; the southern and eastern seaboards of Oriental Mindoro.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.**

Up to moderate to rough seas over the following coastal waters:

- **Up to 2.5 m:** The seaboards of Cuyo Islands, Cagayancillo Islands, and Antique; the western seaboards of Pangasinan, Zambales, Bataan, Cavite, Batangas, and Negros Occidental; the southern seaboards of Iloilo and Guimaras; the remaining seaboards of Camarines Sur, Albay, Sorsogon, and Northern Samar.
- **Up to 2.0 m:** The seaboards of Siquijor, Southern Leyte, Camiguin, Misamis Oriental, and Zamboanga del Norte; the remaining seaboards of Iloilo, Guimaras, Negros Occidental, and Eastern Samar; the southern seaboards of Negros Oriental, Cebu, Bohol, Basilan, Sulu, Tawi-Tawi, and Davao Occidental.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions**.

Other coastal waters have forecast wave heights of less than 2.0 m.

TROPICAL CYCLONE BULLETIN NR. 9
Typhoon INDAY (BAVI)
Issued at 11:00 PM, 09 July 2026
Valid for broadcast until the next bulletin at 5:00 AM tomorrow.

TRACK AND INTENSITY OUTLOOK

- **It must be emphasized that heavy rainfall and severe winds may still be experienced in localities outside the landfall point and the forecast confidence cone. Refer to "Other Hazards affecting Land Areas" for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.**
- INDAY is forecast to generally move northwestward while remaining over the Philippine Sea and may pass closest to Extreme Northern Luzon between tomorrow (10 July) evening and Saturday (11 July) morning. Afterwards, INDAY will move toward the southern islands of Japan and may make landfall or pass close over the northern coast of Taiwan. It will then exit the PAR by Saturday (11 July) morning or afternoon and make landfall over the eastern coast of mainland China by Saturday evening or Sunday (12 July) early morning.
- INDAY is forecast to remain as a typhoon until it exits the PAR. It will then weaken into a severe tropical storm after moving further inland over mainland China.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 5:00 AM tomorrow.
